Introduction

Courses

About Us

MKC Training have been training The Royal Engineers in Construction, Engineering and professional training programmes at Brompton Barracks, the home of the Royal Engineers, for over 14 years.

MKC Training has been training the Royal Engineers since January 2009 within a 30-year Public Private Partnership.

Now 14 years into the contract, MKC Training has redesigned course programmes, enhanced teaching techniques and raised overal pass rates to in excess of 95%.

Modernising training through innovative, blended, and digital learning techniques is at the core of what we do.

We have since opened some of our professional courses to the commercial sector, developing various accredited courses in the following areas:

- Project and Programme Management
- Cyber and ITIL
- Health and Safety
- Construction and Engineering.

MKC Training also delivers custom design training services in support to the Defence and commercial sectors.

We are very proud of our outstanding training record and the success of our trainees.

Some of the Sectors we have Served so far

Health and Care	Security
Ministry of Defence	Rail
Transportation	Construction
Universities and Colleges	Engineering
Defence Contractors	Local Government
Aerospace	

Our Commitment

We are proud to support veterans and the local community, which include:

- The Forces Employment Charity
- Armed Forces Covenant
- Sponsoring military sports teams'
- Assisting veterans
- Sponsoring reserves.

ATO Accreditations

Our Values

OUR
COMMITMENT

Our COMMITMENT to learner success is at the heart of what we do.

A shared passion for our roles drives this commitment - whether it is our teachers delivering world-class training, or support teams who provide exceptional facilities and services; we work together to ensure our learners are equipped to succeed in the next stage of their career.

OUR
COLLABORATION

We are strongest when we COLLABORATE together.

With each other, our learners, customers, supply chain, partners and communities. We are proud of our reputation as an innovative and trusted partner. We are committed to creating a more sustainable future to fight climate change and reduce waste. We contribute to social value, particularly through our significant support to Further Education in the local community.

OUR
INNOVATION

INNOVATION and creativity are key to our future success.

Our commitment to blended, technology-enhanced learning delivers valuable outcomes for our learners and customers. We have earned a reputation for high quality, learner-centred teaching, learning and assessment through continuous improvement. As a learning organisation, what we do well today will be even better tomorrow!

OUR
PEOPLE

We recognise our strength comes from our PEOPLE.

Investing in their development, safety, health and wellbeing empowers us to meet 21st century challenges. We are committed to Equality, Diversity, Inclusion and Intersectionality (EDII), which helps us build an environment in which we all excel without fear of discrimination, harassment or prejudice.

Training Transformation
starts

MKC Training in Defence

MKC Training is responsible for the delivery of construction and engineering training to the Royal School of Military Engineering (RSME) at Brompton Barracks in Kent.

We deliver over 90 courses, from RQF Level 2 to Master's degree level.

We constantly strive to make this training more effective and efficient. Since 2010, we have played a pivotal role in making training at the RSME better, faster and value for money - for both the trainee, and for the Army.

We have successfully achieved this with the design, development and roll-out of an innovative programme of training transformation that blends interactive online digital learning resources with practical tasks.

This approach places trainees at the centre of their own learning experience and;

- Empowers every trainee to realise their full potential

- Enables the development of trainees' self-confidence, critical thinking, and problem-solving skills

- Develops trainees to become autonomous, through life learners, fully engaged in the learning process.

It allows those with natural talent or previous experience to progress more rapidly through the course than their peers.

This principle, which we call fixed-mastery / variable-time training, provides a flexibility that enables many soldiers to be released to the field army much earlier than they would with traditional training methods, which is of significant benefit for the Ministry of Defence (MoD).

Our Training Delivery Methods

We don't focus on just one method of delivery; we are fluid in our approach to training.

Virtual

Virtual learning allows delegates to learn at their own pace and in the comfort of their own home, reducing any anxieties that may come from attending a new classroom course alone.

Virtual instructor-led classrooms allow for improved accessibility so, no matter what your mobility is like, as long as you have a stable internet connection you are able to login to any of our virtual classrooms and start learning!

Online instructor-led learning provides interaction, socialisation and feedback as a group or individually, and is much more powerful than just online learning which is isolated and one way.

Face-to-face

If you prefer a more personalised training method, our face-to-face option may be more suitable. Connect with, problem-solve, and network with other students from a wide range of backgrounds with our face-to-face training.

Blended

Blended learning combines both traditional classroom and online learning. Delegates are able to advance their studies at the rate that works best for them in order to advance more quickly, while others that may struggle can move at their own pace with personalised support.

Bespoke Training Solutions

Since January 2010, MKC Training has been working with the Royal School of Military Engineering (RSME) in the design, development and roll-out of an innovative programme of blended learning that incorporates interactive computer-based learning and practical tasks, referred to as the 'RSME Methodology'.

The new learning system places the delegates at the centre of the experience, providing a greater ownership of their own learning and development. This allows those with natural talent or previous experience to progress more rapidly through the courses than their peers. Online training has the added benefit of ensuring a consistent and regulated delivery model across all courses, and 24 hour access to course materials.

"The course is beneficial as it allows us to work in our own time and pace."

"It lets me refresh small parts of my theory knowledge, rather than sit through a whole lesson."

By tailoring courses you can:

- Present knowledge in familiar contexts, so learners can start applying it straight away
- Associate new information with powerful images they are already familiar with, making it memorable
- Show how the learning ties in with what they do in their workplace
- Create a comfortable learning environment with content specific to your organisation
- Reflect organisational culture through the words and images that are used
- Adapt to meet learning needs.

As well as our core team of Project Managers, Instructional Designers and Content Developers MKC Training also has access to other highly skilled eLearning professionals within MidKent College and a pool of tried and tested freelance staff.

This ability to be flexible on staff resources and to increase our capacity quickly is a key aspect of our service.

PROJECT MANAGEMENT

PROJECT MANAGEMENT

PRINCE2®
Foundation & Practitioner, 6th Edition

4 days

About the Course

PRINCE2 (PRojects IN Controlled Environments), 6th Edition, is a globally recognised project management process model for managing a project in a controlled way. It can be applied to any kind of project in any industry, and includes the activities needed to direct, manage and deliver a project.

It is widely considered as the world's leading project management method, and over 20,000 organisations are already benefiting from this trusted approach.

The PRINCE2 Foundation certification provides an introduction to the method, its principles, roles and themes, and its terminology.

Qualifications offered

PRINCE2 6th Edition Foundation certification and, PRINCE2 6th Edition Practitioner certification.

PeopleCert certifications are globally recognised and highly sought after by potential employers.

Course duration

PRINCE2 Foundation	**3-Days**
PRINCE2 Practitioner	**2-Days**
PRINCE2 Foundation & Practitioner	**4-Days**

PROJECT MANAGEMENT

PRINCE2 Agile®
Foundation & Practitioner

4 days

About the Course

This PRINCE2 Agile course will firstly introduce you to the PRINCE2® methodology and Agile concepts, then build around your newfound knowledge teaching you how to blend structure, governance and control with agile methods, techniques and approaches. Most Agile frameworks have an emphasis on developing empowered teams that can rapidly deliver high value outputs and outcomes but are less concerned with structure and governance.

PRINCE2 Agile brings it all together in a thought provoking package which can be applied to any project in any industry.

Qualifications offered

PRINCE2 Agile Foundation certification and, PRINCE2 Agile Practitioner certification.

PeopleCert certifications are globally recognised and highly sought after by potential employers.

Course duration

PRINCE2 Agile Foundation	**3-Days**
PRINCE2 Agile Practitioner	**2-Days**
PRINCE2 Agile Foundation & Practitioner	**4-Days**

Managing Successful Programmes (MSP®) Foundation & Practitioner

4 days

About the Course

Programme management helps deal with complex change by breaking it down into programmes of manageable, inter-related projects.

The MSP framework is a set of principles and processes for managing programmes of transformational change. The guidance is founded on best practice and yet can be tailored to organisational needs. MSP is equally suited to large and small organisations, in both the private and public sectors. The framework has been developed to help organisations achieve excellence by improving practices, offering better services and preparing more effectively for the future.

Qualifications offered

MSP 5th Edition Foundation certification and, MSP 5th Edition Practitioner certification.

PeopleCert certifications are globally recognised and highly sought after by potential employers.

Course duration

MSP Foundation	**3-Days**
MSP Practitioner	**2-Days**
MSP Foundation & Practitioner	**4-Days**

Management of Risk (M_o_R®4 Practitioner

About the Course

Management of Risk (M_o_R) is designed to help organisations establish an effective framework for risk management, enabling them to make informed decisions about the risks that affect their strategic, portfolio, programme, project, product, and operational objectives. It provides practical guidance for managing risk, showing how risk links to opportunity and the realisation of benefits.

M_o_R 4 is universally applicable and aligned to ISO standards. M_o_R 4 is the latest edition of Management of Risk – a must-have certification for roles where managing risk is inherent, including portfolio, programme, project, business change and risk management professionals.

Qualifications offered

M_o_R 4 Practitioner certification.

PeopleCert certifications are globally recognised and highly sought after by potential employers.

Course duration

M_o_R 4 Practitioner	**3-Days**

Change Management™
Foundation & Practitioner

4 days

About the Course

The Change Management qualification is the definitive certification for project professionals dealing with organisational change, transition and transformation.

This Change Management course has been designed to help you manage the impact of change in your organisation and provide you with techniques to effectively plan and implement successful transformation initiatives.

This course explores how change affects, and is affected by; individuals, teams, organisations and change leaders, equipping you with the knowledge, theories and techniques to successfully implement change in your organisation.

Qualifications offered

Change Management Foundation certification and, Change Management Practitioner certification.

APMG International is the most reputable global accreditation and examination institute.

Course duration

Change Management Foundation	**2-Days**
Change Management Practitioner	**2-Days**
Change Management Foundation & Practitioner	**4-Days**

PROJECT MANAGEMENT

Agile Project Management (AgilePM® Foundation & Practitioner

4 days

About the Course

The Agile Project Management (AgilePM) qualification is the world's leading framework and certification for Agile project management. It offers a practical and repeatable methodology that achieves an ideal balance between the standards, rigour and visibility required for good project management, and the fast-pace, change and empowerment provided by Agile.

This course covers the underpinning philosophy and principles of Agile, the lifecycle of an Agile project, including alternative configurations, and the products produced during an Agile project and their purpose.

You'll also cover the techniques used and their benefits and limitations, and learn the roles and responsibilities of individuals within an Agile project.

Qualifications offered

AgilePM Foundation certification and, AgilePM Practitioner certification.

APMG International is the most reputable global accreditation and examination institute.

Course duration

AgilePM Foundation	**2-Days**
AgilePM Practitioner	**2-Days**
AgilePM Foundation & Practitioner	**4-Days**

Managing Benefits™
Foundation & Practitioner

4 days

About the Course

The Managing Benefits course consolidates existing guidance on benefits management into one place, while expanding on the specific practices and techniques aimed at optimising benefits realisation.

The Guide provides managers and practitioners from multiple disciplines, working in a variety of industries and organisations, with generally applicable guidance encompassing benefits management principles, practices and techniques.

The Managing Benefits qualification is aimed at those with a role in ensuring optimal use of taxpayer and shareholder funds by maximising the benefits realized from change initiatives.

Qualifications offered

Managing Benefits Foundation certification and, Managing Benefits Practitioner certification.

APMG International is the most reputable global accreditation and examination institute.

Course duration

Managing Benefits Foundation	**2-Days**
Managing Benefits Practitioner	**2-Days**
Managing Benefits Foundation & Practitioner	**4-Days**

PROJECT MANAGEMENT

APM Project Fundamentals Qualification (PFQ)

About the Course

The Project Fundamentals Qualification (PFQ) is a short course created by the APM, the chartered body for the project profession. Using the APM Body of Knowledge 7 (BoK7), the PFQ gives learners an awareness of concepts, terms and activities that make up current best practice in the profession.

The learner will leave the course with an understanding of key areas such as what a basic project lifecycle consists of, an understanding of the key roles within a project environment, an understanding of how projects are planned and how stakeholders should be engaged.

The PFQ is an ideal way to start your project management learning journey as it gives learners a broad understanding of the principles of the profession. No prior knowledge or experience is required.

Qualifications offered

Project Fundamentals Qualification (PFQ).

APM (Association for Project Management) is the largest professional body for project management in Europe and has chartered status.

Course duration

PFQ	**2-Days**

2 days

APM Project Management Qualification (PMQ)

5 days

About the Course

This course uses the APM Body of Knowledge 7 (BoK7), which contains the concepts, terms and activities that make up current best practice in the profession. Candidates will gain an in-depth understanding of how the many elements of project management interact.

The Project Management Qualification is aimed at those who want to achieve a broader level of project management knowledge. The course itself digs deeper into areas such as why we do projects, understanding the environment within which we run our projects and it equips you, the delegate, with the knowledge and overview of various techniques on how to do things.

Qualifications offered

Project Management Qualification (PMQ).

APM (Association for Project Management) is the largest professional body for project management in Europe and has chartered status.

Course duration

PMQ	5-Days

"The ideas and techniques learned in the course has changed my vision towards project management. It taught me various methods which I can apply in my career."

Pawan, PRINCE2 Agile course

"Great training, really opened my eyes to the subject. Got the whole group involved."

Ben, APM PMQ course

CYBER AND ITIL

CYBER AND ITIL

ITIL® 4 Foundation Certification

3 days

About the Course

ITIL is a set of best practices for delivering efficient IT support services and guiding digital transformation and technology initiatives. ITIL is the most popular approach to IT Service Management in the world and enables organisations and individuals to deliver cost-effective IT Service Management (ITSM) aligned with business vision, strategy and growth, and acts as a single point of contact between service provider and end users.

While ITSM helps businesses to achieve their mission and vision with the right mix of process, technology and people, ITIL guides the way IT services are managed and delivered.

Qualifications offered

ITIL Foundation Certification.

PeopleCert certifications are globally recognised and highly sought after by potential employers.

Course duration

ITIL4 Foundation	**3-Days**

ITIL® Managing Professional Transition

5 days

About the Course

The ITIL 4 Managing Professional transition course is intended for candidates with the previous iteration of ITIL (ITIL v3) to update their skills to ITIL 4. It provides candidates with an understanding of the new ITIL 4 Foundation concepts and definitions, including the key differences between the previous iteration of ITIL and ITIL 4 and how they can be practically applied.

The transition module enables candidates to recognise their previous achievements while gaining up-to-date skills and knowledge needed to navigate the digital service economy. Upon successful completion of the exam, you will be awarded ITIL 4 Managing Professional status.

Qualifications offered

ITIL 4 Managing Professional Transition Certification.

PeopleCert certifications are globally recognised and highly sought after by potential employers.

Course duration

ITIL Transition	**5-Days**

Cyber Security Awareness

About the Course

This Cyber Security Awareness course will develop a well-informed and positive mindset towards cyber security by becoming security aware. Following this course, you will be able to discuss business and personal cyber security risks aligning to your organisation's strategy.

You will have the appropriate information and a digestible depth of knowledge to help secure business systems and networks. It will also encourage growth of an organisation's security-minded culture and help to protect business assets such as corporate intellectual property, and improve data protection, whilst enforcing good online behaviours and reduce corporate risk.

Qualifications offered

At the end of your course you will be issued with a certificate of attendance.

Course duration

Cyber Security Awareness	1-Day

MKC Training

Cyber Security Fundamentals

2 days

About the Course

This 2-day Cyber Security Fundamentals course is a National Cyber Security Centre Certified training course (NCSC-Certified). If you do not know where to begin in your cyber security strategy, then this course will provide you with the knowledge on where to start it.

This course will provide an effective introduction to cyber security for anyone who is responsible or accountable for the protection of business assets, such as senior IT management or a Chief Information Security Officer (CISO). You will cover the types of personal data that you are trying to protect, who you are trying to protect it from (Attack Profiling), the reason why they attack, how you can protect yourself (and your business) and how to be prepared.

Qualifications offered

Successful completion of this course will mean you will be awarded the NCSC-Certified Training at Awareness Level with IISP Core Skills A1, A2, A3, A4, A5, A6, A7, B1, B2, C1, C2, D1, D2, E1, E2, E3, F1, F2, G1, H1, H2.

Course duration

Cyber Security Fundamentals	2-Days

National Cyber Security Centre

CYBER AND ITIL

Executive Cyber Awareness

1 day

About the Course

This NCSC-Certified course will provide you with the knowledge and relevant context of organisational critical, technical and people factors, involving cyber security.

This course will help you to become better informed of critical business risks associated with cyber security – enabling you to make proportional, impactful decisions.

This Executive Cyber Awareness course is for any business leader who may or may not have an information security background but are required to determine their organisation's cyber security strategy, investment, and culture.

Qualifications offered

Successful completion of this course will mean you will be awarded the NCSC-Certified Training at Awareness Level with IISP Core Skills A1, A2, A4, A5, B1, B2, C1, E1, E3, F1 and IISP Secondary skills H1, A7, C2, D1, D2, A3.

Course duration

Executive Cyber Awareness	**1-Day**

National Cyber Security Centre

Certified Information Systems Auditor (CISA)

4 days

About the Course

This Certified Information Systems Auditor course supports individuals looking to validate your knowledge and experience associated with information security audit and control, so you can monitor and assess your organisation's information technology and business systems.

This course covers the following five domains:

Domain 1 – The Process of Auditing Information Systems.

Domain 2 – Governance and Management of IT.

Domain 3 – Information Systems Acquisition, Development, and Implementation.

Domain 4 – Information Systems Operations, Maintenance and Service Management.

Domain 5 – Protection of Information Assets.

Qualifications offered

Successful completion of this course will mean you will be awarded the ISACA Certified Information Systems Auditor certificate.

Course duration

Certified Information System Auditor	**4-Days**

CISA Certified Information Systems Auditor.
An ISACA® Certification

CREST Certified Incident Manager (CCIM)

3 day

About the Course

This CREST-aligned Incident Management Specialist course provides expert level knowledge and skills required for highly experienced cyber security professionals who have spent significant practitioner time working on incident response engagements.

By the end of this training, you will have expanded and consolidated your technical understanding and practical experience of working on cyber security incidents to manage incidents and relevant stakeholders successfully in your organisation.

This course is ideally for senior practitioner-level cyber security professionals who wish to understand how to manage cyber security incidents effectively.

Qualifications offered

Successful completion of this course will mean you will be awarded the CREST Certified Incident Manager (CCIM) certificate.

Course duration

CREST Certified Incident Manager	3-Days

CYBER AND ITIL

CompTIA IT Fundamentals

About the Course

This 5-day course delivers the CompTIA IT Fundamentals certification. This comprehensively covers all areas of IT foundations, creating a broader understanding of IT making it ideal for non-technical professionals.

CompTIA IT Fundamentals establishes an IT education framework for students in secondary and post-secondary settings.

The course is designed for anyone who uses a PC computer, laptop, mobile device, and IT networks. Those who would like to pass the CompTIA IT Fundamentals certification exam.

This CompTIA IT Fundamentals course will help professionals to decide if pursuing a career in IT is right for them or to develop a broader understanding of IT.

Qualifications offered

Successful completion of this course will mean you will be awarded the CompTIA IT Fundamentals (ITF+) Certification.

Course duration

CompTIA IT Fundamentals	5-Days

5 days

CompTIA Cloud Essentials+

2 days

About the Course

This 2-day CompTIA Cloud Essentials+ course ensures that IT Professionals and other business decision makers who either work for cloud service providers - or who may need to guide their organisation in the utilisation of cloud services – have the skills they need to make solid business recommendations and decisions.

CompTIA Cloud Essentials+ covers cloud services from a business perspective, cloud computing, cloud types, steps to a successful adoption of the cloud, impact and changes on IT service management, risks and consequences. This course is for both IT and non-technical professionals who require the essential acumen needed to make informed cloud service decisions.

Qualifications offered

Successful completion of this course will mean you will be awarded the CompTIA Cloud Essentials+ Certification.

Course duration

CompTIA Cloud Essentials+	**2-Days**

CompTIA.

"Great tips for remembering difficult concepts, he gave detailed examples to apply a theory to the real world and with the practice questions he highlighted key words to look for."

Sophie, CCIM course

"Our trainer was excellent, adding insights from her vast experience to enhance our learning."

Kevin, PRINCE2 Agile course

HEALTH AND SAFETY

IOSH Working Safely Course

About the Course

The IOSH Working Safely course was developed by the Institution of Occupational Safety and Health (IOSH) and gives everyone at work an understanding of why they must 'work safely'. This is an entry-level course suitable across all employees.

After this course organisations can expect to see greater productivity due to fewer hours lost to sickness and accidents, improved company-wide safety awareness culture, appreciation of safety measures and more. This IOSH Working Safely course provides memorable and thought-provoking facts and case studies.

Qualifications offered

IOSH Working Safely Certificate.

Institution of Occupational Safety and Health (IOSH), is the Chartered body and leading membership organisation for safety and health professionals.

Course duration

Working Safely	1-Day

1 day

IOSH Managing Safely® Course

4 days

About the Course

The IOSH Managing Safely course is a Level 3 qualification and is designed to give supervisors, managers and heads of department the knowledge, confidence and tools they need to manage their team's health and safety. It ensures that you can assess and control risks and hazards in the workplace effectively and competently and provides critical training for embedding health and safety principles and practices throughout an organisation.

This Managing Safely course will help you improve the safety awareness culture in your organisation, see your productivity increase and enhance your reputation within your supply chain by embedding safety and health across the whole organisation.

Qualifications offered

IOSH Managing Safely Certificate.

Institution of Occupational Safety and Health (IOSH), is the Chartered body and leading membership organisation for safety and health professionals.

HEALTH AND SAFETY

QA Level 3 Award in First Aid at Work (RQF)

About the Course

The Health and Safety (First Aid) Regulations 1981 require all employers to make arrangements to ensure their employees receive immediate attention if they are injured or taken ill at work. This includes carrying out a risk assessment, appointing a suitable amount of first aiders and providing appropriate first aid training. However, having the correct first aid provision in the workplace is not just a legal requirement, it is incredibly important for the safety of all members of staff!

This official Qualsafe (QA) Level 3 Award in First Aid at Work (RQF) is a regulated and nationally recognised qualification, specifically designed for those who are appointed to act as a first aider in their workplace.

Qualifications offered

QA Level 3 Award in First Aid at Work (RQF) certificate.

Qualsafe Awards is one of the largest Ofqual recognised Awarding Organisations in the UK.

Course duration

First Aid at Work	3-Days

QA
QUALSAFE AWARDS

QA Level 3 Award in Emergency First Aid at Work

About the Course

This Qualsafe (QA) Level 3 Award in Emergency First Aid at Work (RQF) is a regulated and nationally recognised qualification, specifically designed for those who are appointed to provide first aid in a range of emergency situations. It is also ideal for people who have a responsibility to provide basic first aid in voluntary and community activities.

The QA Level 3 Award in Emergency First Aid at Work (RQF) is a regulated and nationally recognised qualification designed for those who have a specific responsibility at work, to provide first aid in a range of emergency first aid situations.

Qualifications offered

QA Level 3 Award in Emergency First Aid at Work (RQF) Certificate.

Qualsafe Awards is one of the largest Ofqual recognised Awarding Organisations in the UK.

Course duration

Emergency First Aid at Work	**1-Day**

QA Level 2 Award in Cardiopulmonary Resuscitation & Automated External Defibrillation (RQF)

0.5 days

About the Course

This QA qualification is for anyone needing the skills to provide basic life support when dealing with an emergency situation which may involve using an automated external defibrillator (AED).

It outlines the knowledge and practical skills needed to provide basic life support, including using an AED safely and assessing and managing a casualty.

This official Qualsafe (QA) Level 2 Award in Cardiopulmonary Resuscitation and Automated External Defibrillation (RQF) course is designed for anyone who has specific responsibility at work, or in voluntary and community activities to provide first aid and/or use an AED in an emergency.

Qualifications offered

QA Level 2 Award in Cardiopulmonary Resuscitation and Automated External Defibrillation (RQF) certificate.

Qualsafe Awards is one of the largest Ofqual recognised Awarding Organisations in the UK.

Course duration

Resuscitation and Defibrillation (RQF)   **0.5-Days**

Abrasive Wheels
User Safety Course

0.5 days

About the Course

Abrasive Wheels are used in many industries, each with specific needs and applications which can present a variety of hazards in the workplace. Correct wheel storage, selection, mounting, testing and operation are essential to their safe and effective use.

This half-day course is for anyone needing to select, test and mount abrasive wheels to hand-held and static (precision and non-precision) grinding machines. It will also be of value to supervisors of tradesmen using abrasive wheels in construction, automotive, manufacturing, utilities and engineering industries.

Qualifications offered

On the second day of your course you will be issued with a certificate of attendance.

Course duration

Abrasive Wheels	0.5-Days

MKC Training

CONSTRUCTION

CONSTRUCTION

Scaffolding Awareness (Understanding Inspection)

About the Course

This course is aimed at anyone who manages sites with scaffolding erections or engages with scaffolding inspectors and needs to be aware of on-site scaffolding from a supervisory or management perspective. They would not be required to sign off scaffolding as safe to use.

You should have awareness and experience of scaffolding structures, coming from time spent in your individual industry sector which you will build upon throughout this course.

Qualifications offered

On the second day of your course you will be issued with a certificate of attendance.

Course duration

Scaffolding Awaresness	2-Days

MKC Training

Introduction to AutoCAD

3 days

About the Course

This course offers you a basic understanding of the operation of Computer Aided Design (CAD) software. It is ideal for anyone looking for an initial introduction to AutoCAD 2D with an interest in using the software to produce 2D drawings for architectural, engineering or design purposes.

AutoCAD is the official standard drafting package for the construction industry. The skills learnt on this course are transferable to other platforms such as Rivet, Bentley, MicroStation and more.

Qualifications offered

On the third day of your course you will be issued with a certificate of attendance.

Course duration

Introduction to AutoCAD   **3-Days**

MKC Training

L3 Diploma in Gas Utilisation and ACS Assessments Phase 1

40 days

About the Course

This Level 3 domestic gas course delivered by MKC Training, will prepare Service leavers for a career as a Gas Engineer with the option to extend into other areas such as commercial gas, smart metering or renewables including hydrogen boilers.

This is an ideal course for Service leavers seeking to learn a trade, and work in multiple locations across several appliances, with the opportunity to further develop into other areas of gas engineering. You must be able to work independently or as part of a small team, completing tasks to the highest quality within time constraints.

Qualifications offered

ACS CCN1 Core Domestic Gas Safety plus up to 3 appliances: CENWAT1 (Central Heating and water heating appliances), CKR1 (Cooking Appliances) and MET1 (Meters)

BPEC Water Regulations Certificate

LCL Awards L3 Diploma in Gas Utilisation

Course duration

ACS Phase 1	**40-Days**

"Excellent training delivered by an extremely knowledgeable trainer. Combined real world examples and personal experience that complimented the course material."

Joe, AutoCAD course

"Informative, entertaining, engaging and interesting. Could not have asked for more."
